

Problem info

Problem type: Steady-State Heat Transfer

Geometry model class: Plane-Parallel

Problem database file names:

- Problem: *steam_pipe.pbm*
- Geometry: *Steam_pipe.mod*
- Material Data: *Steam_pipe.dht*
- Material Data 2 (library): *none*
- Electric circuit: *none*

Results taken from other problems:

- *none*

Geometry model

Table 1. Geometry model statistics

	With Label	Total
Blocks	2	3
Edges	3	6
Vertices	1	6

Number of nodes: 8800.

Labelled objects

There are following labelled objects in the geometry model (Material Data file could contain more labels, but only those labels that assigned to geometric objects are listed)

Blocks:

- [asbestos](#)
- [steel](#)
-

Edges:

- [ArcX](#)
- [outside](#)
- [inside](#)
-

Vertices:

- [vertexX](#)
-

Detailed information about each label is listed below.

Labelled objects: block "asbestos"

There are (1) objects with this label

Thermal conductivity: $\lambda_x=0.8$ [W/(K*m)],
 $\lambda_y=0.8$ [W/(K*m)]

Labelled objects: block "steel"

There are (1) objects with this label

Thermal conductivity: $\lambda_x=42$ [W/(K*m)],
 $\lambda_y=42$ [W/(K*m)]

Labelled objects: edge "ArcX"

There are (2) objects with this label

No material data (boundary conditions) are specified

Labelled objects: edge "outside"

There are (2) objects with this label

Convection: $\alpha=30$ [W/(K*m²)], temperature $T_0=19.85$ [K]

Labelled objects: edge "inside"

There are (2) objects with this label

Convection: $\alpha=100$ [W/(K*m²)], temperature
T0=149.85 [K]

Labelled objects: vertex "vertexX"

There are (1) objects with this label

No material data (boundary conditions) are specified

Results

Field lines

Results

Color map of Heat flux $|F|$ [W/m2]

Nonlinear dependencies

No non-linear dependencies are used in this problem data
